# UNIFORMING STAIN CHART

SCAN ME

This is a clear coat on pine birch and oak which shows the different colors in the natural wood, below are the uniforming stains on all three species showing how even the colors are, This will help even out the natural color variations in wood. Many colors can be made in the uniforming stain system by starting with the ES301, ES325 and ES375 binders combined with water and ELTINTS & ELDYES. See our New Stain System Guide for more details.

**WENGE WIPING**

# CHC STAIN CHART

The Country Heritage Collection (CHC) stains were designed for large high quality Amish furniture manufacturers. These stains are formulated to enhance the natural beauty of the wood and highlight the character of different wood types to provide contrast and pore marking while maintaining uniformity and consistency. Spray on and wipe off or wipe on and wipe off with ease as these stains have excellent open time and blending properties making it easy to achieve consistent color and look on large or complex parts.

# ORIGINAL STAIN CHART

Our original stain chart includes 24 common colours that have been used in the wood industry for years. Based on our SWB104 wiping stain or SSB100 spray stain bases, they offer good workability with strong highlights in the grain. Many of these are based on dyes so they offer rich, vibrant colours that accentuate the natural beauty of whatever wood species they are applied on. Any of these colors can be reformulated into our new stain system,
